- Ensure strict compliance of all laws and regulations in all regions where we operate and identify and bring to the fore all issues of non-compliance.

Industry Outlook

Trigyn is well positioned to continue to grow along with the industry. With the continued economic slowdown which has impacted the US and EU markets, the advantages for companies operating in resource rich markets such as India, will continue to prove to be a source of stability and growth.

It has also been widely reported in the past from several multi nationals with multi-country operations as well as syndicated analysts comparing the various sourcing locations that India offers the best "bundle" of benefits being sought by the global sourcing industry.

Industry Alliances

Trigyn has established partnership with the leading technology companies like Microsoft, EMC², TIBCO® and IBM. Trigyn believes in a partner ecosystem that creates value for its clients through innovative solutions focused on making a difference, and in assisting its clients in achieving their vision, goals and organization objectives. Trigyn shall focus on partnering with emerging software solution vendors who wish to establish base in the India sub-continent and tap the potential in niche areas. Furthermore, Trigyn is an evangelist for open-source and promotes these solutions to clients where these deliver value and unique proposition.

Opportunities and Threats**• Opportunities**

Trigyn is well positioned to leverage the expanding human capital at its disposal through its unique global footprint anchored by its Offshore Development Center (ODC) in Mumbai, India. Trigyn has made impressive progress over the past few years on a number of fronts to ensure its continued growth. Trigyn has a stable operating management team which averages over 5 years with the Company and 15-20 years of industry experience. It has tenaciously and deliberately moved to ensure that its business is derived from multiple sources including Offshore Development, Managed Services and Staff Augmentation, as well as across diverse geographies such as the US, Europe, Africa and Asia. It has worked hard to ensure that a number of the critical business functions are serviced by resources in its ODC and has integrated the cultures across its operations.

- **Threats**

The business revenues are sourced predominantly from the US market. Given the prolonged economic impact in this market, Trigyn's business could be adversely impacted. This impact could also be felt by the State and Local Governments, as these entities are negatively impacted by a loss of tax revenues and institute budget cuts for resources and postpone or cancel projects. Another area of concern for the Company is the increasing level of competition across the IT services industry. With a shrinking number of client dollars and more competitors chasing these dollars, the threat to revenue and equally as significant, profit margins, become ever more likely.

Results of Operations

Net Revenue from Operations for the year ended March 31, 2015 was at Rs. 15,253.77 lakhs representing a decrease of 6.49 per cent over the previous year. Profit before tax for the year was at Rs. 50.33 representing a decrease of 99.18 per cent over the previous year. After providing for income tax expenses of Rs. 48.09, profit after tax was Rs 2.24 lacs. Previous year profit after tax includes extraordinary item of Rs. 5106.70 Lacs write back of excess provision for diminishing in value of investment.

The Company mainly operates in a single segment i.e. Information Technology Services and therefore segment reporting as required under Accounting Standard -17 is not applicable.

Risks and Concerns

The revenue growth and profitability of the business of Trigyn is subject to the following:

- Changes in the domestic and international economic and business conditions
- Commoditization of the Offshore Software Services business
- Foreign exchange rate fluctuations
- Length of the sales cycle
- Success in expanding the global operations through direct sales force and indirect distribution
- Economic downturn impacting our customers
- Activities of our competitors
- Allocation and availability of resources

Based on the preceding factors, the Company could experience a shortfall in revenues or earnings or fail to meet the public market expectations, which could materially and adversely affect the business operations, financial condition and market price of the Company's shares on the stock market.

Internal Control System and their Adequacy

Trigyn continuously reviews its Internal Control system in order to further strengthen and make it commensurate with the size and nature of the business which currently is well defined and commensurate with the scale of operations of the Company.

The CFO certification provided in the Annual Report discusses the adequacy of our internal control systems and procedures.

The Company uses various delivery mechanisms for imparting knowledge to its employees.

- **Diversity and Gender Equality**

Trigyn is committed to diversity across all of the geographic locations where it provides services and solutions to its customers. To this end, the Company continues to enter into contracts with several US based Minority and Women owned businesses. Outside of the USA, the Company has undertaken a number of initiatives aimed at broadening the diversity of its work force, from its operations in India to a number of its work locations around the globe. Trigyn has also taken steps to ensure Gender Equality throughout its operations and has launched specific initiatives to ensure Gender Equality throughout all facets of its operation. Trigyn developed and adopted an Affirmative Action Plan in the US, to ensure operational compliance with its objectives and values.

NOTES TO FINANCIAL STATEMENTS**1. GENERAL INFORMATION**

Trigyn Technologies Limited ('TTL' or 'the Company') was incorporated on March 25, 1986. TTL has its software development center in Mumbai, India ('the Head Office') and the Company operates in US through its subsidiary Trigyn Technologies Inc.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**a) Basis of preparation**

The Financial statement of the Company have been prepared on accrual basis under historical cost Convention, in accordance with generally accepted accounting principles in India (Indian GAAP) to comply with the accounting standards specified in section 133 of the Companies act,2013 read with rule 7 of the Companies (Accounts) Rules 2014 and relevant provisions of the Companies act,2013. Accounting policies have been consistently applied except where a newly issued accounting Standard is initially adopted or a revision to the Existing accounting Standard or a more appropriate presentation of the financial statements requires a change in the accounting policy hitherto in use.

b) Use of estimates

The preparation of the financial statements in conformity with GAAP requires the management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, the useful lives and provision for impairment of fixed assets and intangible assets.

Management believes that the estimates used in the preparation of financial statements are prudent and reasonable. Future results could differ from these estimates.

c) Tangible assets, intangible assets and capital work-in-progress

Tangible assets are stated at cost of acquisition, less accumulated depreciation/amortisation and impairments, if any. Cost includes taxes, duties, freight and other incidental expenses related to acquisition.

Intangible assets are recognized only if it is probable that the future economic benefits that are attributable to the assets will flow to the enterprise and the cost of the assets can be measured reliably. The intangible assets are recorded at cost and are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Application software capitalized as Intangible Asset is normally amortized over a period of four years or over its useful life before it becomes obsolete, whichever is earlier

Capital work-in-progress comprises cost of fixed assets that are not yet ready for their intended use at the year end.

d) Depreciation and amortisation

Depreciation on additions and disposals is provided pro-rata for the period of use.

Depreciation is provided on Straight Line Method, over the period of estimated useful life of the assets, as stipulated in Schedule II to the Companies Act 2013 with effect from 1st April 2014 or based on useful life wherever assessment is carried out by the management as per technical advice. The useful lives which are different from Schedule II are as follows :-

Asset	Useful life
Buildings	20 years
Office equipments	3 to 4 years
Computer and peripherals	3 years
Computer software	3 years
Furniture and fixtures	4 years
Motor vehicles	4 years and 2 months

Leasehold land is amortised over the primary period of the lease

NOTES TO FINANCIAL STATEMENTS**e) Impairment**

At each Balance Sheet date, the Company assesses whether there is any indication that the fixed assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. Where it is not possible to estimate the recoverable amount of individual asset, the Company estimates the recoverable amount of the block of asset to which the asset belongs.

As per the assessment conducted by the Company at March 31, 2015, there were no indications that the fixed assets have suffered an impairment loss.

f) Investments

Investments that are readily realisable and are intended to be held for not more than one year from the date, on which such investments are made, are classified as current investments. All other investments are classified as long term investments. Current investments are carried at cost or fair value, whichever is lower. Long-term investments are carried at cost. However, provision for diminution is made to recognise a decline, other than temporary, in the value of the investments, such reduction being determined and made for each investment individually.

g) Foreign currency translation**Initial Recognition**

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Subsequent Recognition

As at the reporting date, non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. All non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

All monetary assets and liabilities in foreign currency are restated at the end of accounting period.

Exchange differences on restatement of all other monetary items are recognised in the Statement of Profit and Loss.

h) Revenue recognition

Income from Communications and information technology staffing support services comprise income from time and material and fixed price contracts. Revenue from 'time and material' contracts is recognised, as and when related services are performed and accepted by the customer. Revenue from fixed price contracts is recognised using the percentage of completion method of accounting, under which the sales value of performance, including the profit thereon, is determined by relating the actual man hours of work performed to date to the estimated total man hours for each contract. Provision for estimated losses on uncompleted contracts are recorded in the period in which such losses become probable, based on current contract estimates.

Unbilled receivables represent costs incurred and revenues recognised on contracts, to be billed in subsequent periods as per the terms of the contract.

Interest and Other income are accounted for on accrual basis except where the receipt of income is uncertain in which case it is accounted for on receipt basis.

i) Employee benefits

Contributions to the employees' provident fund, which is a defined contribution scheme, are charged to the statement of Profit and Loss in the year in which the contributions are due. Leave encashment costs are provided for, based on an actuarial valuation carried out by an independent actuary at the balance sheet date. Gratuity costs, which are defined benefits, are based on an actuarial valuation carried out by an independent actuary at the balance sheet date.

Retention bonus is accounted on actual payment basis. Gratuity is funded through LIC and hence outstanding liability towards contribution to Gratuity fund included under 'Short Term Provisions'.

j) Current and deferred tax

Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961.

NOTES TO FINANCIAL STATEMENTS

Minimum Alternative Tax (MAT) credit, which is equal to the excess of MAT (calculated in accordance with provisions of Section 115JB of the Income tax Act, 1961) over normal income-tax is recognised as an asset by crediting the Statement of Profit and Loss only when and to the extent there is convincing evidence that the Company will be able to avail the said credit against normal tax payable during the period of ten succeeding assessment years.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. In the event of unabsorbed depreciation and carry forward of losses, deferred tax assets are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available to realise such assets. In other situations, deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available to realise these assets.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and the Company intends to settle the asset and liability on a net basis.

k) **Provisions and contingent liabilities**

Provisions: Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Contingent liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is termed as a contingent liability.

l) **Leases**

Assets given under operating lease are reflected in the financial statements under fixed assets. Further, lease income from such operating lease arrangements have been recognised in the statement of profit and loss on a straight line basis over the lease term.

m) **Cash and cash equivalents**

In the cash flow statement, cash and cash equivalents includes cash in hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less.

n) **Earnings per share**

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

o) **Stock based compensation**

Compensation cost relating to employee stock options granted by the Company has been accounted in accordance with the "SEBI (Employees Stock Option Scheme and Employees Stock Purchase Scheme) Guidelines, 2000" issued by Securities and Exchange Board of India. Accordingly, the excess of the market price of the underlying equity share as at the date of grant of the option over the exercise price of the options on the date of grant has been recognized as employee compensation expense and is reflected as 'Employee Stock Options Outstanding' under the head 'Reserves and Surplus'.

These liabilities represent about 20% of the total consolidated gratuity and leave encashment liability of the Group as at the year end.

(c) Use of estimates

The preparation of the financial statements in conformity with GAAP requires the management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, the useful lives and provision for impairment of fixed assets and intangible assets.

Management believes that the estimates used in the preparation of financial statements are prudent and reasonable. Future results could differ from these estimates.

(d) Tangible assets, intangible assets and capital work-in-progress

Tangible assets are stated at cost of acquisition, less accumulated depreciation/amortisation and impairments, if any. Cost includes taxes, duties, freight and other incidental expenses related to acquisition.

Intangible assets are recognized only if it is probable that the future economic benefits that are attributable to the assets will flow to the enterprise and the cost of the assets can be measured reliably. The intangible assets are recorded at cost and are carried at cost less accumulated amortization and accumulated impairment losses, if any. Application software capitalized as Intangible Asset is normally amortized over a period of four years or over its useful life before it becomes obsolete, whichever is earlier

At each Balance Sheet date, the Company assesses whether there is any indication that the fixed assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. Where it is not possible to estimate the recoverable amount of individual asset, the Company estimates the recoverable amount of the block of asset to which the asset belongs.

As per the assessment conducted by the Company at March 31, 2015, there were no indications that the fixed assets have suffered an impairment loss.

(g) Investments

Investments that are readily realisable and are intended to be held for not more than one year from the date, on which such investments are made, are classified as current investments. However, Provision for diminution is made to recognise a decline, other than temporary, in the value of the investments, such reduction being determined and made for each investment individually.

(h) Foreign currency translation

Initial Recognition

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Subsequent recognition

As at the reporting date, non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. All non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

All monetary assets and liabilities in foreign currency are restated at the end of accounting. Period and the resultant exchange differences on restatement are recognised in the Statement of Profit and Loss.

Non-Indian operations

The consolidated financial statements are reported in Indian rupees. The translation of the local currency of each foreign subsidiary, considered as non integral operations, and conversion of foreign branches, which are integral to the operations within the Group into Indian rupees is performed in respect of assets and liabilities other than fixed assets using the exchange rate in effect at the balance sheet date and for revenue and expense items other than the depreciation costs using a simple average exchange rate for the year. Equity Share Capital, Share premium, Capital Reserve and Fixed Assets which have been valued at Historical rate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**(l) Revenue recognition**

Income from information technology staffing support and consultancy services comprise income from time and material and fixed price contracts. Revenue from 'time and material' contracts is recognised, as and when related services are performed and accepted by the customer. Revenue from fixed price contracts is recognised using the percentage of completion method of accounting, under which the sales value of performance, including the profit thereon, is determined by relating the actual man hours of work performed to date to the estimated total man hours for each contract. Provision for estimated losses on uncompleted contracts are recorded in the period in which such losses become probable, based on current contract estimates. The revenue allocated to post-contract customer support is recognized ratably over the term of the support and revenue allocated to service elements such as training, installation and customization is recognized as the services are performed.

Unbilled receivables represent costs incurred and revenues recognised on contracts, to be billed in subsequent periods as per the terms of the contract.

Interest and Other income are accounted for on accrual basis except where the receipt of income is uncertain in which case it is accounted for on receipt basis.

(j) Employee benefitsGratuity:

The Company and its Indian subsidiaries account for the gratuity benefits payable in future based on independent actuarial valuation. The liability is not funded except in the case of one subsidiary, where the liability is funded. The company & its subsidiaries follow different assumptions as such the compilation would become unwieldy and for the sake of brevity details are not included in the consolidated financial statements.

Leave encashment / Compensated absences:

The Company and its Indian subsidiaries account for the liability towards Leave Salary on the basis of year end actuarial valuations applying the Projected Unit Credit Method done by an independent actuary. The actuarial gains or losses determined by the actuary are recognized in the statement of Profit and Loss as income or expense.

Contributions payable by the company to the concerned government authorities in respect of provident fund, family pension fund and employees state insurance are charged to the Statement of Profit and Loss. In case of foreign subsidiaries, employee benefits are accounted in accordance with the applicable local laws.

Gratuity is funded through LIC and hence outstanding liability towards contribution to Gratuity fund included under 'Short Term Provisions'

(k) Current and deferred tax

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to overseas operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum alternative tax (MAT) paid in accordance with the tax laws, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Group will pay normal income tax after the tax holiday period. Accordingly, MAT is recognized as an asset in the balance sheet when it is probable that the future economic benefit associated with it will flow to the Group and the asset can be measured reliably.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

In the event of unabsorbed depreciation and carry forward of losses, deferred tax assets are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available to realise such assets. In other situations, deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available to realise these assets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and the Group intends to settle the asset and liability on a net basis.

(l) Provisions and contingent liabilities

Provisions: Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Contingent liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is termed as a contingent liability.

(m) Leases

Assets given under operating lease are reflected in the financial statements under fixed assets. Further, lease income from such operating lease arrangements have been recognised in the statement of profit and loss on a straight line basis over the lease term.

(n) Cash and cash equivalents

In the cash flow statement, cash and cash equivalents includes cash in hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less.

(o) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

(p) Stock based compensation

Compensation cost relating to employee stock options granted by the Company has been accounted in accordance with the "SEBI (Employees Stock Option Scheme and Employees Stock Purchase Scheme) Guidelines, 2000" issued by Securities and Exchange Board of India.
